

We are pleased to introduce a **Fax to Email Service** to RBE Internet customers.

**Fax to Email** means that incoming faxes will go straight to your email box and you can view and/or print them from your email programme.

To use our Fax to Email service you can transfer your existing dedicated fax number to our service or choose to use either an Adelaide number or a Regional number as your fax number.

(Your fax number must not be the same number that your ADSL is activated on.)

If you transfer your dedicated fax number to our service your existing line will be disconnected, thus saving you the cost of line rental.

Charges are as follows :

Area	Set up fee	Monthly charge
Adelaide number	\$5.00	\$7.50
Regional number	\$35.00	\$10.00
to port your existing number	\$55.00	\$7.50

I would like to :

- port my existing fax number to RBE Internet : Fax No. \_\_\_\_\_
- apply for an RBE Internet Fax to Email service on :  
an Adelaide number  
a Regional number

We will require a signed Authority from you prior to transferring your current fax number to RBE Internet Services. Once we have your indication of interest on this form we will forward the Authority for your confirmation of transfer.

Name : \_\_\_\_\_
