- Notes :
- Fees are charged monthly in advance
  - Shaped Plans : once your chosen data limit is reached your speed will shape back to 512K until the end of that month.
  - Unlimited plans do not disconnect beyond any usage point. However speed is slowed beyond 300GB/month to 1Mbps download. This speed is estimated to be adequate for essential internet activity. RBE Internet reserves the right to restrict internet speeds in situations of security concern (eg client virus infection or other cause of uncontrolled data over-use). Contact us to resume full line speed.
  - Plan changes take effect at the beginning of the following month
  - Downloads only are counted in your data allowance : unused monthly data expires
  - **Standard NBN equipment installation by NBNCo technicians is included : additional charges apply if installation is non standard**
